PROJECTS

Trekker – Trip Expense Tracker Web App

Next.js, Tailwind, Clerk, Supabase, Prisma, Tesseract.js,

WebSockets

- Built a real-time group expense tracker with integrated OCR for extracting UPI payment data from screenshots.
- Implemented live group chat and a real-time expense feed using WebSockets for seamless collaboration.
- Led full-stack development including trip creation, user authentication, expense logging, AI-based parsing, chat integration, and final settlement computation.

E-Commerce – Online Shopping Platform

Next.js, Clerk, Sanity CMS, Stripe, Tailwind CSS, Shadcn UI,

Zustand

- Developed a full-stack e-commerce platform with secure user authentication, product catalog management, shopping cart functionality, and seamless checkout experience.
- Built a responsive and modern user interface using Next.js, Tailwind CSS, and Shadcn UI, enabling efficient product browsing, filtering, and order tracking across devices.
- Integrated Clerk for authentication, Sanity CMS for dynamic product and content management, and Stripe for secure payment processing and order handling.

DevCollab – Collaborative AI Code Review Platform

Next.js 15, TypeScript, tRPC, Drizzle, Supabase,

Claude API, Inngest, SSE

- Implemented an interactive git diff viewer supporting multi-threaded comment resolution, asynchronous video walk-through uploads via UploadThing, and line-level developer presence powered by Server-Sent Events (SSE).
- Engineered an AI-driven code review assistant using the Claude API to scan pull request diffs, stream token-by-token feedback on style/bugs/security, and generate one-click mergeable suggestion fixes.
- Architected a scalable backend utilizing Inngest background workers for webhook synchronization, tRPC for end-to-end typesafe API communication, and Upstash Redis for multi-tier API rate-limiting.
